

Data Analysis

Objective:

You will work in groups of **2 or 3** to propose a **goal** you intend to achieve using the provided dataset. Your task is to analyze the dataset based on the goal you have in mind and produce a meaningful interpretation of your findings.

Dataset Description:

The dataset contains financial and operational data collected from the **Taiwan Economic Journal** for the years **1999 to 2009**. It focuses on companies listed on the Taiwan Stock Exchange, with **bankruptcy status** defined according to official business regulations.

Tasks:

- Formulate a Goal
- Analyze the Data
 - Use any tools you are comfortable with (Excel, Python, R, Power BI, etc.)
- Produce a Meaningful Output
